SEMINAR OF NFPA 25

June 1 - 2, 2013 • 09:00 – 17:00 • Titan Center • Indonesia

Attend NFPA 25: Inspection, testing, and Maintenance of Water-based Fire Protection System Seminar and earn your Certificate of Educational Achievement.

Enhance NFPA 25 training and confirm your knowledge of how NFPA 25 provisions help you keep system in peak condition and ready to respond. Designed from an inspector's perspective, NFPA's 2011 NPFA 25 2-days Seminar is taught by industry authorities involved in the development of NFPA 25 and features classroom instruction on the critical interaction between installation documents and NFPA 25, the owner's responsibilities for compliance, and the process for handling impairments.

Learn how to locate and apply requirements for the periodic inspection, testing, and maintenance of water-base fire suppression system and their water supplies.

Upon completing you should be able to:

- Recognize the requirements and procedures for the inspection, testing, and maintenance of private service mains, common valve components, system valves, and sprinkler and standpipe systems
- Plot flow test result to determine causes of water supply problems
- Identify who is permitted to perform inspection, testing, and maintenance
- Evaluate system test data

- Differentiate between the types of storage tanks and their inspection and safety concerns

Who will benefit:

Anyone whose responsibilities include the inspection, testing and maintenance of water-based fire protection system including: maintenance professionals, sprinkler system contractors, building owners, and enforcement officials.
